Summary

As a Front End Web Developer, I am striving to create functional and beautiful websites to my clients. I received my Full Stack Developer certification through UC Davis, and worked on many projects, both solo and in groups. My ability to work with a team and my attention to detail and design helped make the websites I worked on efficient and accessible. My hope is to carry over all the skills and knowledge I have learned in my time at UC Davis and apply that to a new career in the web development world.

Technical Skills

Languages: HTML, CSS, JavaScript, JQuery, NodeJS, Express, MongoDB.

Projects

Insta-Date | <https://github.com/brianpraseuth/Group-Project-1-Insta-Date> | <https://brianpraseuth.github.io/Group-Project-1-Insta-Date/>

Insta-date is a website that can be used to generate a random meal recipe, drink recipe, and play music for the ideal date night.

My responsibility on the project was finding the right API's to use, and to help code the page CSS.

In this project, we used HTML, CSS, JavaScript, JQuery, and Materialize.
